

ACV Fh 136 Copies from diverse notaries 1490 to 1499

The main index covers only fols. 1-22. It is followed by a sort of analytical index grouped by place names that includes, apparently, all the of the folios, but in a form that is difficult to follow and which apparently includes separate entries for all parties to each transaction. Some of the names in the second index appear to those of parties who held the same obligations at some later date, listed in the margins. These later notations are not transcribed here.
