List no. 265: Matrikel, 1865.

This list consists of 8 sheets, 16 sides, but the original microfilm form 1944 was damaged at some point, leaving some sections completely invisible and others too dark to read with certainty. However, the entries are numbered sequentially, and there is also a separate sequential numbering within households, with the result that it is possible to make some inferences about missing data. At the end of the list, there is a summary showing that, in 1865, there were 72 households with Jewish residents, for a total of 314 persons, an increase of 3 households and 14 persons over the previous year. One of the columns asks for the exact date of birth for all persons under the age of 13, but the data in this column are frequently illegible. The data are listed below in order, but the columns have been simplified for ease of transcription.
