This volume is the first of a two volume set that continues the plan in Fn 307-308. Fn 309 contains fols. 1-241v (originally ending with blank folios 242-257v, which were suppressed during a restoration in 1939), and the second volume, Fn 310, begins with fol. 258. Many, but not all of the documents summarized in this volume exist in the Archives Communales de Moudon, which also holds other documents pertaining to the hospital that seem not to be found in Fn 307-310. A large part of the original repertorium of Fn 309, which indexes both Fn 309 and Fn 310, has been lost, but was reconstructed by the ACV during a restoration.

The entire series of volumes, Fn 307-310, needs to be analyzed in detail. The information presented here is a digest of the (reconstructed) repertorium, supplemented with transcripts and paraphrases from the main text.

The documents held by the hospital at that time were organized into “fardelli” or bundles, each containing a maximum of 100 items. Fn 307-308 contain bundles A-E, which appear to be nearly complete, and part of F. Fn 309 begins with bundle I. It is possible that bundle F had not been filled, and that the rubrics G and H were not in use, reserved for future expansion. Beyond that supposition, the organization of archives of the hospital in the 15th Century is unknown. It is not yet known whether most of the documents concerning the hospital that are now in the AC Moudon can be matched with the contents of Fn 307-310. If a large number of such documents are not found in Fn 307-310, we might infer that additional bundles existed but were not copied or extracted, or perhaps they might have been copied into a volume that is now lost. Also still to be determined is whether additional documents relating to the hospital prior to about 1450 can be identified in other terriers. Not all of the documents referenced in Fn 307-310 directly concern the hospital, as some of them involve earlier transactions, before properties or financial obligations were eventually transferred to the jurisdiction of the hospital. Also, documents added after about 1445 lack sequence numbers, presumably because they were so recent they had not been assigned to a bundle. There is also a marginal notation dated in 1501, the latest date known in these volumes.

(The folio numbered 1 is blank except for an obscure and not entirely legible aphorism ? at the top.)

67 Johannes Nibuli antenatus burgensis de Melduno, accensation for the Grange de Fremont granted by Petrus Vioneti burgensis de Melduno rector et rectorio nomine hospitalis pauperum Beate Marie Virginis de Melduno, grangiam dictam novam, grangiam veterem de Fremont, et grangiam dictam douz Bos, and various other properties, 06 mar 1435, recorded by Jaquetus Quoquerel notarius de Melduno, pro copia, with signature and paraphe of Uldriodus Guilly. (Margin : I lxxi / Reconditam est in glassia Vici Textorum. The word glassia (evidently ablative plural of glassium ?) is used several times in these volumes, from the context meaning a place where documents have been stored. Beyond that obvious conclusion, we have not discovered an exact meaning or derivation.)

69v ~~(Johannes Nibuli antenatus burgensis ac procurator et procuratorio nomine totius ville et communitatis de Melduno, no more text, evidently duplicating the preceding item, entirely lined out, but with marginal sequence number I lxxii, which, however, is found again on fol. 72, for a different item)~~ Nicodus Mossuz burgensis de Melduno, reconnaissance, 09 sep 1450, recorded by Jaquetus Malle clericus Melduni, lacks signature and paraphe of the copyist, this item likely added later, as the script is somewhat different, and this item also lacks marginal sequence number.

(Fol. 71v is blank.)
